

MOHAMMAD KHORAJIYA

Java Backend Developer

+91 87802-70802 | khorajiyamohammad724@gmail.com | github.com/MohammadKhorajiya

SUMMARY

Java Backend Developer with hands-on experience developing secure REST APIs using Java, Spring Boot, Spring Security, MongoDB, and Redis. Experienced in JWT authentication, RBAC, asynchronous processing, external API integration, automated testing, and cloud deployment. Strong foundation in OOP, multithreading, Java Collections, Streams, and Lambdas.

EXPERIENCE

Java Backend Developer Intern

Mar 2026 – May 2026

Pulse Circle — Remote

- Developed secure RESTful backend services using Java, Spring Boot, and Spring Security with stateless JWT authentication and role-based authorization.
- Designed MongoDB data-access layers using Spring Data MongoDB, including indexing and aggregation-based queries.
- Developed unit and integration tests using JUnit 5 and Mockito while supporting API testing, SonarQube analysis, and Render cloud deployment.

PROJECTS

Bhadas AI — Intelligent Prompt & AI Service API

May 2026 – Present

Java / Spring Boot / REST APIs / WebClient / Generative AI / Render

- Built a Spring Boot backend integrating Generative AI APIs with prompt processing, sanitization, and structured response handling.
- Implemented non-blocking external API communication using Spring WebClient with retry and rate-limiting mechanisms.

GitHub: github.com/MohammadKhorajiya/bhadas-ai

JournalApp — Secure Journal Management API

Jan 2026 – Present

Java / Spring Boot / Spring Security / MongoDB / Redis / JUnit / Mockito

- Developed a secure REST API with JWT authentication and RBAC using Spring Boot and Spring Security.
- Integrated MongoDB and Redis caching, reducing backend latency by 40%+, with 90%+ automated test coverage using JUnit and Mockito.

GitHub: github.com/MohammadKhorajiya/JournalApp **API:** Swagger / OpenAPI

Task Assignment System — Asynchronous Task Management API

Apr 2026 – Present

Java / Spring Boot / Spring Security / MongoDB / JavaMailSender

- Built a RESTful task-assignment system with JWT authentication and role-based authorization using Spring Security.
- Implemented thread-safe task synchronization with ConcurrentHashMap and asynchronous email notifications using Spring @Async.

GitHub: github.com/MohammadKhorajiya/task-assignment **API:** Swagger / OpenAPI

TECHNICAL SKILLS

Languages: Java 8+, OOP, Collections, Streams, Lambdas, Multithreading, SQL

Backend: Spring Boot, Spring Security, Spring Data MongoDB, REST APIs, JWT, RBAC

Database & Caching: MongoDB, Redis

Tools & Testing: JUnit 5, Mockito, Maven, Git, GitHub, Postman, SonarQube, Swagger / OpenAPI, Render, IntelliJ IDEA

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Hemchandracharya North Gujarat University (HNGU)

CGPA: 6.47

CERTIFICATIONS

Java Backend Development Internship Certification

2026

Pulse Circle — Remote
